Introduction

Bolt DIY with Gemini 2.5 Pro represents a groundbreaking opportunity for businesses, marketers, and developers to create custom applications completely free of charge. This powerful combination allows you to harness Google's advanced AI model (Gemini 2.5 Pro)

through the open-source Bolt DIY platform to build fully-functional apps, games, and tools without writing a single line of code yourself.

Key benefits of this approach:

- **100% Free:** When using the experimental version with free API keys
- **Local Deployment:** Everything runs on your machine
- **No Coding Required:** Just describe what you want to build
- **Fast Results:** Generate functional apps in minutes
- **Customizable:** Easily modify and improve your creations

Want to master AI tools like Bolt DIY and transform your business? Join the [AI Profit Boardroom](#) where you'll get weekly updated SOPs, templates, and strategies to scale your business, get more customers, and save hundreds of hours through AI automation.

Setting Up Your Environment

Installing Bolt DIY

Bolt DIY is an open-source project that you can easily set up locally. Follow these steps:

1. Access the GitHub repository for Bolt DIY
2. Open Terminal (Mac) or Command Prompt (Windows)

Copy and paste the installation commands:

```
git clone https://github.com/bolt-diy/bolt-diy.git
cd bolt-diy
npm install
```

3. `npm start`
4. Wait for the installation to complete and the local server to start

Troubleshooting Tip: If you encounter any issues during installation, copy the entire error message from your terminal (Ctrl+A, then Ctrl+C) and paste it into Claude or ChatGPT with a request for help setting up Bolt DIY.

Getting Your Free API Key

To use Gemini 2.5 Pro, you'll need an API key:

1. Navigate to [AI Studio](#)

2. Click on "Get API Key"
3. Create a new API key
4. Copy the key to your clipboard

Alternative API Source:

- You can also get an API key from [Open Router](#)
- This may provide access to different model versions

Selecting Your Model

Bolt DIY offers multiple model options:

1. Open Bolt DIY in your browser (typically at <http://localhost:3000>)
2. Select "Google" as your provider
3. Choose your preferred model version:
 - **Gemini 2.5 Pro Experimental** (\$0 in, \$0 out) - Completely free
 - **Gemini 2.5 Pro Preview** (Pay per token) - More powerful but has costs

Best Practice: Start with the free experimental version. Only upgrade to the preview version if you need enhanced capabilities for complex projects.

Building Your First App

Effective Prompt Strategies

The quality of your app depends significantly on your prompt. Here's how to create effective prompts:

1. **Be Specific:** Clearly describe what you want to build
`Build a space invaders game with 3 levels, power-ups, and a scoring system.`
2. **Include Design Instructions:** Mention visual elements and style
`Use a neon retro style with bright colors on a dark background.`
3. **Start Simple:** Begin with basic functionality, then enhance
`Give me a simple demo I can test. No need to build out the full`

game yet.

4. **Industry-Specific:** Relate apps to your business domain

Create an SEO keyword difficulty calculator that visually represents competition levels.

Testing and Previewing

Once Bolt DIY generates your app:

1. Wait for the coding process to complete
2. Click the "Preview" button in the top-right corner
3. Test all functionality in the preview window
4. Note any issues or improvements needed

Iterative Improvement

Bolt DIY excels at iterative development:

1. **After testing, provide specific feedback**
Add more detail to the game. Make it more interesting with cool backgrounds. Make it feel more immersive.
2. **Enhance UI elements**
Make the design more modern and sleek. Use a duolingo style with engaging visuals and animations.
3. **Fix specific issues**
The drag and drop feature isn't working properly. Please fix the matching function.

Advanced Techniques

Enhancing Prompts

Use AI to improve your prompts:

1. **Prompt Generator:** Click the "Enhance the prompt" button at the bottom of Bolt DIY
2. Review the enhanced version and modify as needed
3. Alternatively, use ChatGPT to improve your prompts:
Improve this prompt for Bolt DIY: "Build a simple SEO game"

UI and Design Improvements

Take your apps from basic to polished:

1. **Reference Existing Designs:**
Make the UI similar to Duolingo with engaging animations and a clean interface.
2. **Add Visual Elements:**
Add custom icons for each feature. Include a progress bar and celebration animations when users complete tasks.
3. **Improve User Experience:**
Add a tutorial overlay for first-time users. Make buttons larger and more visually distinct.

Adding Game Mechanics

For game-based applications:

1. **Core Gameplay:**
Add a point system where users earn points for correct answers. Include a timer to create urgency.
2. **Progression:**
Create three difficulty levels with increasingly challenging questions. Add a level-up animation between stages.
3. **Rewards:**
Add collectible badges for achievements. Include a leaderboard to encourage competition.

Troubleshooting

Common Issues

Issue	Solution
Installation errors	Copy error message and ask AI assistant for help
Black screen in preview	Refresh the page or restart Bolt DIY
Unresponsive UI elements	Ask AI to fix specific interactive elements
Missing features	Provide clearer instructions about required features
Code stops generating	Check API rate limits or switch models

API Rate Limits

Free API keys often have usage limitations:

1. **Monitor Usage:** Keep track of your API usage in AI Studio
2. **Alternate Keys:** Have multiple API keys ready to swap
3. **Batch Projects:** Plan your development to avoid hitting limits
4. **Time Distribution:** Spread complex projects across multiple days

Model Switching

If you encounter issues with one model:

1. Use the dropdown in Bolt DIY to switch between models
2. Try switching from Experimental to Preview (or vice versa)
3. Use the "Continue" button to resume from where you left off
4. Consider trying different API providers if available

Get access to 50+ Free AI SEO Tools that can help you implement these techniques and more at [AI SEO with Julian Goldie](#).

Alternative Approaches

Firestore Studio

Firestore Studio offers an alternative approach with some advantages:

- 1. **Access:** Navigate to [firebase.studio](#)
- 2. **Briefing Approval:** Provides a detailed blueprint before building
- 3. **Multiple Projects:** Build multiple apps simultaneously
- 4. **Code Access:** View and export all generated code files
- 5. **Free Usage:** Limited to 10 workspaces at a time

Firestore Studio Process:

- 1. Enter your app idea
- 2. Review and approve the blueprint
- 3. Provide your Gemini API key when prompted
- 4. Test and refine your application

Comparing Options

Feature	Bolt DIY	Firestore Studio
Setup Process	Local installation required	Web-based, no installation
Blueprint/Planning	Minimal	Detailed planning document
Simultaneous Projects	Not supported	Supported
UI Quality	Basic, needs refinement	More polished by default
Code Access	Limited	Full access to all files
Workspace Limits	Unlimited	10 free workspaces
Publishing	Manual	Built-in publishing feature

When to Choose Each:

- **Bolt DIY:** For quick prototypes and local development
- **Firestore Studio:** For more polished applications with minimal setup

Project Ideas

Games

SEO and marketing-themed games provide engaging ways to educate clients and team members:

1. **Backlink Builder Tycoon:**
 - Build and manage your backlink portfolio
 - Different link types offer varying SEO value
 - Balance quality vs. quantity decisions
2. **Anchor Text Match Game:**
 - Drag and drop to match anchor text with appropriate landing pages
 - Score points for natural, relevant matches
 - Learn proper anchor text distribution
3. **SEO Mythbusters Quiz:**
 - Test knowledge of common SEO misconceptions
 - Provide educational feedback for incorrect answers
 - Track progress and knowledge improvement
4. **White Hat Defender:**
 - Identify and block black hat SEO techniques
 - Protect websites from penalties
 - Learn ethical SEO practices

Business Tools

Practical applications for your business:

1. **Keyword Difficulty Analyzer:**
 - Visual representation of keyword competition
 - Keyword grouping and categorization
 - Opportunity identification
2. **Content Brief Generator:**
 - Create structured content outlines
 - Include keyword targets and search intent
 - Generate H1, H2, H3 structure automatically
3. **Local SEO Checklist:**
 - Interactive checklist for local optimization
 - Progress tracking and task management
 - Location-specific recommendations

Educational Apps

Tools for training and learning:

1. **SEO Algorithm Timeline:**
 - Interactive history of major Google updates
 - Impact visualization and key takeaways
 - Best practice recommendations

2. **Technical SEO Simulator:**

- Test and fix common technical issues
- Visualize crawling and indexing processes
- Practice identifying and resolving problems

3. **Client Reporting Dashboard:**

- Visualize key performance metrics
- Custom reporting templates
- Automated insights and recommendations
